

FTR Interrogator™ 4.1

ForTheRecord®

RECOMMENDED SYSTEM REQUIREMENTS:

For Recording Audio and Large Video*

- Microsoft® Windows® 2000 SP4 with update rollup 1**, XP Professional SP1/SP2
- 3.4 GHz Intel® Pentium® D processor
- 1024 MB memory
- 1024x768 High color (16 bit) display
- Windows compatible stereo sound card
- CD or DVD recordable drive or network access
- FTR® and Windows compatible video capture card – *complete listing at www.fortherecord.com/compatiblecards*

FTR Interrogator is a complete digital interview room solution that enables investigators to capture, playback, annotate, save and manage audio/video recordings of custodial interrogations and interviews.

Benefits of FTR Interrogator in your day-to-day operations

- Enjoy greater versatility and more useful, time-saving tools than a DVR
- Leverage your existing infrastructure such as cameras and microphones
- Create linked notes while viewing live or previously recorded interviews
- Isolate/duplicate and play back specific segments of interviews on a PC or DVD player
- Easy to setup and use - minimal impact on your current operating procedures
- Simply import field recordings and search across all interviews for a given case
- Instantly access specific recorded segments - no more rewinding or fast forwarding!
- Quickly search, retrieve and play back relevant content directly from your computer
- Simplify transcript creation through FTR's free, feature-rich TheRecord Player

For maximum flexibility, FTR Interrogator is available in two¹ configurations and includes the following items to accommodate the individual configuration chosen:

- **Interrogator™**
- **TheRecord Player™**
- **TheRecord Recorder™** (available with Interrogator Plus only)
- **FTR Headset**
- **WordLink®²**
- **5-pack of TheRecord Album™ DVD recording media**

When recording with FTR Interrogator Plus, a time-and-date watermark is indicated on each recorded frame, which means that the authenticity of the recording can be verified at any time. While recording is in progress, the content can be simultaneously archived to another location. With Interrogator Plus, you can quickly achieve considerable savings in storage costs and space!

With FTR Interrogator, users can create indexed notes that are linked directly to recorded audio/video. These linked notes can be rapidly searched to locate specific words or phrases and the corresponding audio/video segment instantly played. Field recordings from portable hand-held voice recorders³ can be imported to become part of the permanent record for a particular case.

FTR Interrogator's rich, usable feature set, combined with the simplicity and versatility of its operation, makes it the perfect choice for interview rooms that require a single cost-effective solution for capturing & managing digital audio/video recordings.

*Large video is 640x480, small video is 320x240

**TheRecord Player requires DirectX® 9, Windows Media® Player 9 and Internet Explorer® to be installed when using Windows® 2000.

NOTE: As with any software there are hardware and software requirements which need to be in place prior to installing and using TheRecord software. While this list shows the recommended system requirements, it is important to be aware that using additional programs may require a higher specification.

¹Two options are: (1) FTR Interrogator™ Plus, which includes TheRecord Recorder – one installation per interview room and (2) FTR Interrogator™, which does NOT include TheRecord Recorder - enables investigators to search, retrieve & access recordings directly from their desk as well as import and associate any field recordings.

²WordLink is a Microsoft Word add-in that offers FTR Interrogator users the option to create linked notes in Word while recording or playing back audio/video, or while listening to or watching live interviews.

³Currently compatible with Olympus digital voice recorders DS2200 and DS3300 – visit our website law enforcement section for a complete listing of compatible devices.

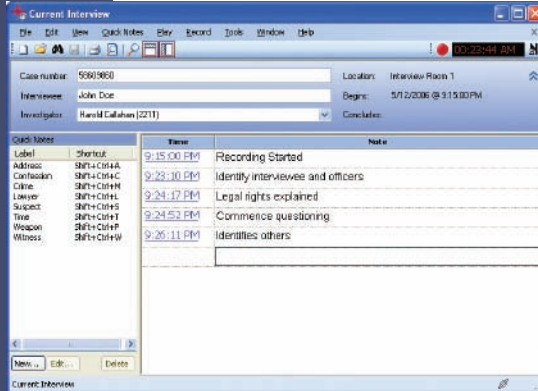

How FTR Interrogator Helps You Be More Efficient

ForTheRecord®

VERSATILE!

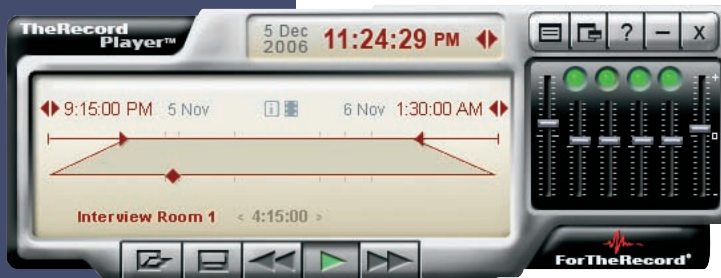

- Superior quality video and audio recordings
- Transition to smaller, lighter, longer-lasting and cost-effective digital storage media
- Easier transcription of recordings with the use of FTR's free TheRecord Player, resulting in more accurate transcripts

FTR Interrogator Main Window

Video Window

TheRecord Player

- Improve productivity without changing established procedures

Investigators

- Minimal training – does not require you to spend hours in a training class!
- Watch your colleague conduct an interview from a supervisor's office or other location
- Search and retrieve all interview recordings directly from your desk
- Instantly access relevant, specific points in a given recording – no repeated rewinding or fast forwarding
- Easily share all or selected portions of interviews with your colleagues
- Duplicate required segments to CD or DVD
- Import field recordings and index marks, and associate them with the corresponding case – everything is now indexed and searchable!

Prosecution & Defense

- Gain immediate access to interview recordings
- Quickly access specific points of interest within a long interview for a more detailed review
- Make personal linked notes about the case while reviewing audio/video
- Save valuable review time with superior quality recordings
